Summary/weekly reflection for Week 5:

This week, I focused on several important activities related to the Real Estate project:

- Conducted a supervisor meeting (30 minutes) to discuss the progress and obtain valuable guidance for ongoing tasks.
- Held a team meeting (1.5 hours) to coordinate with team members, review progress, and clarify individual responsibilities.
- Worked extensively on implementing a dual-language system for the web application, dedicating approximately 7 hours to enhance usability and accessibility. However, I ran into several issues during implementation and am still actively working to resolve them.
- Devoted 2 hours to identifying and resolving various issues and bugs, improving the application's stability and performance.

Key learnings from this week's activities included deeper insights into multilingual web development complexities and practical experience in collaborative project management. Additionally, I reviewed relevant literature on dual-language implementation strategies, which provided useful insights for ongoing work. Challenges this week primarily revolved around the dual-language implementation, highlighting the importance of thorough testing and continuous refinement.

Tasks planned for the upcoming week include another supervisor meeting scheduled for 07-04-25 to ensure consistent project alignment and progress.
