**Summary/weekly reflection for Week 9:**

**Key tasks done / things attended:**

This week, I attended both the supervisor and client meetings to discuss progress and receive feedback. I spent a significant portion of time working on the implementation of the chat system and maps integration. Additionally, I resolved UI bugs on the "Contact Us" and "About Us" pages and began finalizing the Sprint 3 documentation.

**Key things learned about Engineering Technology Projects:**

I learned the importance of iterative testing and user feedback in UI development. Meetings with the client and supervisor also reinforced the need for clear communication and agile adaptability when priorities shift mid-sprint.

**Any literature read and key things learned:**

No formal literature was reviewed this week, but I explored documentation on integrating real-time chat and map features, enhancing my understanding of frontend-backend synchronization.

**Issues/problems:**

Managing time between bug fixes, ongoing feature development, and documentation was challenging. Balancing these priorities will be a focus going into next week, especially with the handover document work approaching.
